Work History

Frontend Web Developer

Sept 2024 - Present

Atomic Asher LLP

- Developing and maintaining responsive and dynamic web applications using modern front-end technologies.
- Collaborating with the team to design user-friendly interfaces and implement client requirements.

React JS Intern

June 2024 - August 2024

Celebal Technologies

- Completed comprehensive training in MERN stack development during MCA 1st semester. Acquired proficiency in building full-stack web applications using MongoDB, Express.js, React, and Node.js.

Projects

Atomique.ai

[Live View](#)

- *Tech Stack:* Next.js, Socket.io, Tailwind CSS
- Atomique.ai is an all-in-one AI hub offering a suite of intelligent tools that boost productivity and simplify workflows. The platform features Atomique Translate, a real-time translation app built using Next.js and Socket.io for instant communication, with Tailwind CSS ensuring a sleek, responsive UI.

StopScams.in

[Live View](#)

- *Tech Stack:* Next.js, AI SDK, Clerk Authentication, Tailwind CSS
- StopScams.in uses advanced AI-driven message analysis to detect and prevent potential scams. It also provides paid consultancy services that guide users through resolving “digital arrest” fraud cases.
- Integrated secure authentication using Clerk and implemented modern AI SDKs for real-time threat detection and analysis.

WithYour.dog

[Live View](#)

- *Tech Stack:* Next.js, Airtable, Ola Maps API, Tailwind CSS
- WithYour.dog connects pet owners and enthusiasts to a trusted ecosystem of dog-friendly services and pet-friendly locations. Built location-based discovery features using Ola Maps API and managed data efficiently with Airtable.
